Sir:

PETITION TO WITHDRAW HOLDING OF ABANDONMENT UNDER 37 CFR 1.181(a)
AND MPEP § 711.03(c)(I.)(A.)

Grant of the present Petition and revival of the subject application due to the non-receipt of a further notice from the Patent Office are requested.

The Office is alternatively requested to treat the present Petition under 37 CFR 1.137(a) as a Petition to revive for unavoidable abandonment, in the event the procedure outlined in MPEP § 711.03(c)(I.)(A.) is not believed to be appropriate. The Office is authorized to charge the undersigned's Deposit Account No. 14-1140 for the fee required by 37 CFR 1.137(a) in the event the Office treats the present Petition under 37 CFR 1.137(a). In the event the Office deems it most appropriate to treat the present paper as a Petition under 37 CFR § 1.137(a), the applicants submit that that the entire

delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to 37 CFR 1.137(a) was unavoidable.

As a further alternative, the Office is requested to treat the present Petition under 37 CFR 1.137(b) as a Petition to revive for unintentional abandonment, in the event the procedure outlined in MPEP § 711.03(c)(I.)(A.) and the requirements of 37 CFR § 1.137(a) are not believed to have been met. The Office is authorized to charge the undersigned's Deposit Account No. 14-1140 for the fee required by 37 CFR 1.137(b) in the event the Office treats the present Petition under 37 CFR 1.137(b). In the event the Office deems it most appropriate to treat the present paper as a Petition under 37 CFR § 1.137(b), the applicants submit that that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to 37 CFR 1.137(b) was unintentional.

The applicants submit that the present application became abandoned due to the failure of the Patent Office to notify the applicants of the deficiency of the Sequence Listing filed July 16, 2007 noted in the Patent Office internal document bearing the time stamp of July 26, 2007(copy attached).

Specifically, the Notification of Abandonment dated September 19, 2007 states the reasons for abandonment as applicants alleged failure to respond to the Notification of Missing Requirements mailed September 25, 2006 within the time period set therein.

In fact, the applicants filed a response to the Notification of Missing Requirements dated September 25, 2006 on November 1, 2006, i.e., within the two

month time set by the Notification for responding. The due date for responding was extendible to April 25, 2007.

On June 14, 2007, the Patent Office mailed a Notification of Defective Response with a Sequence Listing Validate Report indicating that, among other things, SEQ ID NOs: 1 and 11 of the Sequence Listing filed November 1, 2006 were defective because "a Xaa can only represent a single amino acid, not a group of amino acids or a motif."

The Notification of Defective Response mailed June 14, 2007 set a one month non-extendible due date for responding. The applicants filed a response with an amended Sequence Listing on Monday, July 16, 2007.

The Patent Office internal document bearing the time stamp July 26, 2007 indicates that the Sequence Listing filed July 16, 2007 is rejected or otherwise not acceptable because the definition for "Xaa" in SEQ ID NOs: 12-23 is "amino acid" rather than "any amino acid".

The applicants did not receive a copy of the Patent Office internal document bearing the time stamp July 26, 2007 until after receipt of the Notification of Abandonment dated September 19, 2007 when the undersigned obtained the same from the PTO IFW. A search of the undersigned's file jacket associated with the above-identified application and docket records of the undersigned's firm indicates that the Patent Office internal document bearing the time stamp July 26, 2007 (copy attached) was not received until the undersigned obtained the same on September 21, 2007 from the Patent Office IFW. A copy of the Patent Office internal document bearing the time stamp July 26, 2007 was not received with the Notification of Abandonment dated

AND MPEP § 711.03(c)(I.)(A.)

September 19, 2007 nor did the Notification of Abandonment provide any further reason or basis for the abandonment.

The undersigned's records indicate that the undersigned spoke with Ms Paulette Kidwell, who signed the Notification of Abandonment dated September 19, 2007, on September 21, 2007 and that the undersigned was advised that under the normal circumstances a further Notification would have been mailed requiring a further correction of the Sequence Listing however in the present case such a further Notification was not mailed. The undersigned's records indicate that Ms Kidwell indicated that the person generating the Patent Office internal document bearing the time stamp July 26, 2007 was responsible for sending the further Notification or any errors in the Sequence Listing.

The undersigned's records further indicate that the undersigned spoke with Ms Nancy Marie Corrigan (Tel. No. 571-272-2501) on September 21, 2007, after having telephoned and left a message for Mr. Mark Spencer whose name is identified in the attached Patent Office internal document bearing the time stamp July 26, 2007, and that Ms Corrigan indicated that the office which generated the Patent Office internal document bearing the time stamp July 26, 2007 was not responsible for advising the applicants of the errors. As with the error report forwarded with the Notification of September 25, 2006, Ms Corrigan is believed to have advised the undersigned that Ms Paulette Kidwell was responsible for forwarding the error report of July 26, 2007 (i.e., the Patent Office internal document bearing the time stamp July 26, 2007).

More importantly perhaps, the undersigned believes Ms Corrigan was not able to identify any specific passage in the Law, Rules, MPEP or WIPO Standard ST.25 (1998),

JACOTOT ET AL.

AND MPEP § 711.03(c)(I.)(A.)

referred to in 37 CFR § 1.821, for example, which states that the use of the phrase “amino acid” in the definition for Xaa in a Sequence Listing, instead of “any amino acid” is a valid basis for holding an application abandoned.

The abandonment of the present application due to the use of the phrase “amino acid”, instead of “any amino acid” is unreasonable and was unavoidable given the believed lack of guidance in the Law, Rules and MPEP, with regard to a prohibition on the use of a specific form or wording for the definition of Xaa in a Sequence Listing. Moreover, the Law, Rules and MPEP are not believed to prescribe abandonment of an application, without notice and an opportunity to correct such an error in form not predictable or specifically prescribed in the Rules.

At a minimum, the applicants believe a further notice of the error should have been provided with a time period set for correction of the error. Such a notice was not received, as stated above, and the applicants believe therefore that the present application should be treated according to MPEP § 711.03(c)(I.)(A.) where an Office Action was not received by the applicants.

The undersigned appreciates that there is no evidence in the Patent Office IFW that Patent Office mailed an Action which was not received by the applicants such that the facts of the present case may not meet the circumstances described in MPEP § 711.03(c)(I.)(A.).

Should the Patent Office deem the present facts to not meet the circumstances described in MPEP 711.03(c)(I.)(A.), the Office is requested to treat the present application as having been unavoidably abandoned. The Office is authorized to charge

the undersigned's Deposit Account No. 14-1140 for the fee required by 37 CFR

1.137(a) in the event the Office treats the present Petition under 37 CFR 1.137(a).

The abandonment of the present application due to the use of the phrase "amino acid", instead of "any amino acid" was unavoidable given the Law, Rules and MPEP, which are not believed to require a specific form or wording for the definition of Xaa in a Sequence Listing and, moreover, are not believed to prescribe abandonment of an application, without notice and an opportunity to correct such an error in form not predictable or specifically prescribed in the Rules. Further, the statement in the error report dated July 6, 2007 that Xaa can "only represent a single amino acid" is believed to reasonably suggest that the definition of Xaa as "amino acid" would be appropriate. As the Xaa holds or designates a single position in the sequence, the definition of Xaa as "single amino acid" would appear to have been redundant and rejected by the Patent Office.

In the event the Office deems it most appropriate to treat the present paper as a Petition under 37 CFR § 1.137(a), the applicants submit that that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to 37 CFR 1.137(a) was unavoidable.

Grant of the present request to revive the above-identified application based on the present paper being treated as a Petition under Rule 137(a) is alternatively requested.

Finally, as a further alternative, the Office is requested to treat the present Petition under 37 CFR 1.137(b) as a Petition to revive for unintentional abandonment, in

the event the procedure outlined in MPEP § 711.03(c)(I.)(A.) and the requirements of 37 CFR § 1.137(a) are not believed to have been met. The Office is authorized to charge the undersigned's Deposit Account No. 14-1140 for the fee required by 37 CFR 1.137(b) in the event the Office treats the present Petition under 37 CFR 1.137(b). In the event the Office deems it most appropriate to treat the present paper as a Petition under 37 CFR § 1.137(b), the applicants submit that that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to 37 CFR 1.137(b) was unintentional.

The required further reply in the form of a further Amendment and revised Sequence Listing is being filed separately herewith.

An early and favorable response and revival of the present application are requested.
